Product Assembly Instruction

*Notice: With the camera well aligned, please make the objects as close to the center of the camera as possible. (Within the 400*400mm working area) The precision will be decreased as the engraving objects are moved away from the camera center.

Scan the QR code below to get the detailed assembly and function demonstration tutorials as well as the Official LightBurn guidance document: <https://docs.lightburnsoftware.com/Camera/index.html>
