

### Left Motor:

Add left motor and motor fixing plate, please pay attention to the details to install

### Right Motor:

The motor and motor fixing plate haven't changed, please pay attention to the details to install

### To adjust the motor current settings:

Because the frame is very huge, the motor's current needs to be adjusted to increase the power. Please adjust the current in the clockwise direction as shown in the figure. For more detailed operations, please watch the video.

### Important note:

Because there are many installation steps, it is strongly recommended to watch the YouTube installation video. Follow the video installation will be much easier. Please scan the QR code to get the video URL.
